Access Tower Mobile information anytime, anywhere!

Discover Tower Mobile, TechRules' new solution

Access Tower information anytime, anywhere!

Access to information anytime and anywhere is essential to adequately and efficiently respond to your clients' requirements.

At **TechRules** we want to make sure that all of our clients can count on a tool that allows them to be constantly updated. Tower Mobile is the new Tower functionality that enables our customers to access our system through a wide range of mobile devices.

Designed as a web solution, it allows advisors to provide a differentiated service, optimizing the generation of investment proposals and helping to create, manage and keep track of portfolios.

Tower Mobile: innovation for Tower users

Tower Mobile allows financial advisors to access various Tower modules through different mobile devices. With just one click, the user of Tower Mobile may visualize portfolios and check each client's file or delivered proposals.

All relevant information is finally available for our clients. Anytime, anywhere!
